The Endoscopy e-Learning Programme

Build your skills to perform endoscopy safely and effectively

- **Designed for endoscopists and endoscopy assistants**

- **Written by practising clinicians in the UK**

- **Highly interactive, with videos, case studies and questions**

Gastrointestinal (GI) endoscopy is playing an increasingly vital role in the diagnosis and ongoing monitoring of many conditions, including life-threatening cancers.

The need for highly trained endoscopists who are up to date with the latest techniques and technologies has therefore never been greater[1].

The *Endoscopy e-Learning Programme* is designed to help fulfil that training need. It covers the core areas of endoscopy that all practitioners need to understand to work safely. The programme is suitable for doctors, surgeons and nurses.

1. NHS figures for the UK but this is also relevant on a global scale.

key features at a glance

- **Quality-assured content**
  This e-learning covers core skills and knowledge in endoscopy. It has been written by senior clinicians, many of whom work as trainers. The authors have been chosen for their specialist knowledge in many different areas of endoscopy.

- **A practical focus**
  The content is highly interactive, with many videos and images (e.g. CT scans and cross-sectional diagrams) of endoscopy to help embed learning and understanding.

- **Real-life patient case studies**
  You can test your knowledge using interactive case studies involving many different patient scenarios during endoscopic examinations.

- **An essential learning tool**
  The programme is primarily designed for training and induction. The Joint Advisory Group on GI Endoscopy (JAG) recommends this as essential learning for all endoscopy professionals.

- **Standardised resources**
  The programme can be used for initial training or as a refresher on key themes. It has been endorsed by the Royal College of Physicians.

- **Easy online access**
  Learn at your own pace – studying wherever and whenever you choose. Each session takes just 30 minutes to complete so you can fit the learning around your busy life.

In partnership with:

![NHS Health Education England logo]

The content covers a wide range of topics, from performing an examination through to safe sedation, risk assessment, dealing with complications and patient-centred care.

Written by clinicians for clinicians
The programme has been developed by Health Education England e-Learning for Healthcare and the Joint Advisory Group on GI Endoscopy (JAG) – which provides quality assurance for all aspects of endoscopy in the UK. It has been written and peer-reviewed by leading clinical experts.

Highly interactive and engaging, the content is packed with videos and images from endoscopy examinations to help you put the learning into a practical context and reinforce your understanding on the complex principles involved.

It is arranged into short, bite-sized learning sessions that you can complete at your own pace, whenever you have some free time.

The programme is available online so you can study at home, in work or even on the move.

Flexible learning to suit your needs
You can work through any sessions that are relevant to your training or specialist interests and complete these in any order. You can use the content in preparation for lectures or practical work and also for more general reference.

You can track your progress online and download or print off a certificate on successful completion of each module.

The *Endoscopy e-Learning Programme* offers an invaluable, practical tool to support your learning and development.
