

e-Dementia

Interactive learning that covers all aspects of dementia care

© Cathy Greenblat

© Cathy Greenblat

- Explores the experiences and perspectives of people affected by dementia, with video interviews and case studies
- Suitable for all health and social care workers
- Written by leading dementia researchers from the University of Bradford

With *e-Dementia*, you will build the knowledge, skills and understanding needed to provide the highest quality care to people with dementia.

The content covers a wide variety of issues, such as understanding what it is like to live with dementia, supporting people to live well with the condition, communication skills and end of life care.

Drawing on the latest global research, this e-learning reflects the key principles of the Prime Minister's Challenge on Dementia 2020, which aims to ensure person-centred, compassionate dementia care. However, the programme is suitable for healthcare professionals globally.

What's more, since the content is available online, you can study anywhere, anytime.

key features at a glance

- **High-quality evidence-based content**
The content has been written by eminent UK researchers and educators in person-centred dementia care. It meets the highest educational standards.
- **A multi-professional resource**
e-Dementia is relevant to nurses, medical students, doctors, healthcare assistants, domestic workers and clerical staff. It is suitable for fully qualified professionals and trainees alike.
- **Reflective elements**
The programme includes video interviews and case studies. The highly engaging content helps to embed learning and foster deeper understanding and empathy.
- **Reflective questions**
Interactive exercises allow you to explore dementia from the perspective of people living with the condition and consider the role you can play in improving care.
- **Flexible and accessible**
The programme is available online so you can study in the workplace, at home or even on the move.
- **Bite-sized learning**
e-Dementia is organised into short learning sessions. Each session takes around 30 to 40 minutes to complete – ideal for fitting around a busy professional life.
- **Signposting to additional resources**
Each session directs you to additional resources on the topic.

The global impact of dementia

Around 50 million people globally are currently living with dementia¹. With an ageing population and improved recognition of the condition, this figure is expected to reach more than 130 million by 2050. So, the need for expert learning in this area has never been greater.

e-Dementia is designed to help you provide person-centred, compassionate care to people living with the condition, either at their home, in hospital or in a care home. There is a particular focus on understanding the psychological and emotional impact of living with dementia.

Highly engaging, interactive content

The learning content includes video interviews with people affected by

dementia and their families to help you understand the challenges they face and how they overcame these issues. There are also interactive exercises and links to further resources.

The content has been written by top researchers from the University of Bradford, which was awarded the Queen's Anniversary Prize 2015 for its work on person-centred care for people affected by dementia.

Convenient, easy access

e-Dementia is arranged into bite-sized online learning sessions so you can study around your work. On successful completion, you can print off a certificate as evidence for your

training or continuing professional development records.

Accessible online, *e-Dementia* offers an invaluable resource for all health and social care workers.

PURCHASE NOW

“Using interactive exercises and multimedia features, learners can gain a better understanding of what it’s like to live with dementia and their role in providing person-centred care.”

Professor Murna Downs,
Centre for Applied Dementia Studies,
University of Bradford

¹ Alzheimer's Disease International

course overview

The *e-Dementia* programme is arranged into two modules.

Module 1:

Introduction to Living with Dementia

Aimed at raising awareness about dementia and suitable for all who work in the health and social care sectors.

There are two e-learning sessions:

- Dementia awareness
- Person-centred dementia care

Module 2:

Enabling People to Live Well with Dementia

Ideal if you work directly with people affected by dementia (e.g. a nurse, healthcare assistant or doctor).

Topics covered include:

- Identification, assessment and diagnosis of dementia
- Risk, reduction and prevention
- Communicating with people affected by the condition

- Living well with dementia
- The role of families and carers
- Research and evidence-based practice
- Law, ethics and safeguarding
- End of life dementia care
- The ethical and legal frameworks
- Diversity and dementia

You can complete some sample sessions on our website.
