

The *Paramedics* e-learning programme

High-quality online learning for busy paramedics

- Evidence-based learning to support professional development
- Written and peer-reviewed by experienced paramedics in the UK
- Highly interactive content with videos, case studies and questions

Build your competencies and confidence using this quality-assured learning resource for paramedics.

The programme explores a variety of themes that are critically important to a paramedic's work, such as pain management, clinical decision making, ethics and mental health issues. It is continually updated and expanded to reflect new clinical developments and best practice.

This e-learning has been developed in the UK by the College of Paramedics, but the clinical themes are relevant to paramedics globally.

You can access the programme online and study at your own pace – anywhere, at any time.

key features at a glance

- **Written by paramedics for paramedics**

The programme has been developed and formally endorsed by the College of Paramedics. This is the professional body which represents paramedics in the UK.

- **Highly engaging content**

The content includes case studies, self-assessment exercises, video clips and animations to provide a dynamic and interactive learning experience.

- **Flexible learning**

You can select topics that are relevant to your learning needs. Each bite-sized learning module takes around 20 to 30 minutes to complete.

- **Convenient online access**

You can study at your own pace – between shifts, clinical cases or whenever you have a few spare minutes. You can dip into the content and return to any modules as many times as you wish.

- **A versatile resource**

This e-learning is suitable for qualified paramedics, trainees, community first responders, healthcare assistants and all practitioners involved in pre-hospital care.

- **Standardised learning**

You and other learners all access standardised, quality-assured resources – providing consistent training for all.

In partnership with:

Practical learning

The work of a paramedic brings ever-changing clinical situations and challenges. This wide-ranging programme reflects the varied nature of a paramedic's role – helping you to stay up to date with your practice and preparedness.

You can explore common clinical issues and those encountered on a less frequent basis – such as serious neck injuries, complex births or critically ill children.

The content has been written by practising paramedics who are also experienced educators in the field. It is packed with videos, case studies, animations and questions, which help to embed learning on key themes and foster deeper understanding.

You can build your knowledge using patient case studies – which can then be applied to your everyday work. There are also links to further reading sources to study topics in more depth.

Progress can be tracked online and you can download a certificate on successful completion of each topic and assessment.

Learning at your pace

You can dip into the content whenever convenient and revisit any modules as many times as needed.

The *Paramedics* programme can be used for general learning, as a refresher on key themes or combined with traditional methods, such as face-to-face learning. Teaching staff

can also use the e-learning materials in local training programmes.

This e-learning provides a versatile, top-class resource that fits in with your busy life.

PURCHASE NOW

“This is a first-class educational resource for busy paramedics. The high-quality, interactive content is available online so you can study wherever and whenever you choose – keeping your knowledge and skills up to date and in line with the latest clinical guidance.”

**Gerry Egan, Chief Executive,
College of Paramedics**

course content

The programme includes 10 topics, which are divided into bite-sized learning modules.

Each module has been specifically written by experienced paramedics and educators in the field:
